APS MARCH MEETING 2015

AT A GLANCE

Dates: March 2 – 6, 2015
Location: San Antonio, Texas
Venue: Henry B. Gonzalez Convention Center
HQ Hotel: Grand Hyatt San Antonio
Abstracts: More than 9,000 submitted
Attendees: More than 9,000 expected
Hashtag: #apsmarch
Units: 23 participating

ABOUT

The American Physical Society’s annual March Meeting is one of the largest physics meetings in the world, bringing together more than 9,000 physicists and students to present groundbreaking research from industry, universities, and major labs from all over the globe.

PARTICIPANTS

Undergraduate Students: 12%
Graduate Students: 25%
Ph.D.: 63%

SCIENTIFIC PROGRAM AREAS

More than 9,000 technical papers will be presented, covering:

- Applications
- Beams physics
- Biophysics
- Carbon nanotubes
- Chemical physics
- Clusters
- Complex fluids
- Computational physics
- Disorder & composites
- Experiments & measurements
- Fluids & quantum fluids
- Fullerenes
- Glassy & amorphous systems
- Graphenes
- Highly correlated metals
- Layered systems
- Magnetism
- Materials
- Metal-insulator transition
- Nanomaterials
- Nonlinear phenomena
- Optical properties
- Phase transitions
- Polymers
- Quantum hall effect
- Quantum information
- Quasicrystals
- Thin films
- X-ray & neutron scattering
- Semiconductors
- Spintronics
- Superlattices
- Surfaces
- Superconducting materials
- Superconductivity theory
- Superconductors

American Physical Society | One Physics Ellipse, College Park, MD 20740 | 301-209-3200
