

Report of the American Physical Society Study Group on Boost-Phase Intercept Systems for National Missile Defense

Thematic Index

Due to the bulk of information contained in this report, the following index is provided as a quick guide to specific topics within the report. Please note that the Findings section (page xxxiii) contains cross-references to much of the content.

Executive Summary (page xxv) - Brief introduction to results, the charge to the study group, the focus on boost-phase intercept, the key issues

Findings (page xxxiii) - Detailed findings of the report, categorized with cross-references to the relevant chapters and sections of the full report

Glossaries (page G-1 – back of both volumes) - Definitions of acronyms and technical terms

Themes

Ground-based interceptors

Section 4.3: Surface-Based Interceptors	page 53
Section 4.5 Terrestrial Planar Engagements	page 55
Chapter 5: Defending the United States Using Surface-Based Interceptors	page 63

Space-based interceptors

Section 4.7: Space Based Engagement of ICBMs	page 60
Chapter 5: Defending the United States Using Space-Based Interceptors	page 103

Airborne Laser intercept

Section 2.3: Overview of the Analysis for the Airborne Laser	page 20
Chapter 7: ABL Engagement Fundamentals	page 131
Chapter 8: Defending the United States Using the Airborne Laser	page 135
Section 9.2: Countermeasures to the ABL	page 150
Part D: Supporting Analysis for Airborne Laser Engagements	page 293
Chapter 17: Overview of the Airborne Laser Analysis	page 295
Chapter 18: Technology of the Airborne Laser	page 299
Chapter 19: Airborne Laser Beam Propagation	page 305
Chapter 20: Disabling Missiles Using the ABL	page 315
Chapter 21: Airborne Laser Engagements	page 321
Chapter 22: Deployment Considerations for the ABL	page 341
Appendix D: Beam Propagation and Corrections	page 393

Report of the American Physical Society Study Group on Boost-Phase Intercept Systems for National Missile Defense

Defending against missiles launched from North Korea

Executive Summary: Defending the United States	page xxx
Section 3.1: Ballistic Missile Capabilities of Selected States	page 33
Section 3.3.2: Transfer of ballistic missile technology and systems	page 36
Section 5.4: Defending against ICBMs Launched from North Korea	page 79
Section 5.8.1: Controlling shortfall for North Korea	page 97
Section 8.3: Defending against Missiles Launched from North Korea	page 137

Defending against missiles launched from Iran

Executive Summary: Defending the United States	page xxx
Section 3.1: Ballistic Missile Capabilities of Selected States	page 33
Section 5.6: Defending against ICBMs Launched from Iran	page 90
Section 5.8.1: Controlling shortfall for Iran	page 99
Section 8.5: Defending against Missiles Launched from Iran	page 140

Missile types

Chapter 3: Ballistic Missile Threats to the United States	page 29
Chapter 15: Ballistic Missile and Trajectory Models	page 261
Chapter 16: Terrestrial-Based Interceptor Models	page 279
Appendix A: Ballistic Missile Types and Phases of Flight	page 345

Shortfall

Executive Summary: Key Issues	page xxviii
Finding #10	page xxxvi
Section 2.4.3: Shortfall (Key Issues)	page 24
Section 5.8: Avoiding Harming Other Countries	page 96
Section 8.7: Controlling Shortfall (Airborne Laser)	page 143
