Host an APS Conference for Undergraduate Women in Physics

The application process for future sites is open! Expressions of interest are accepted on a rolling basis, but all interested applicants must submit a formal proposal by November 1.

The primary goal of the Conferences for Undergraduate Women in Physics (CUWiP) is to increase recruitment and retention of undergraduate women in physics by:

1. communicating the breadth of education and career paths open to physics majors;
2. disseminating information and advice on applying for summer research, graduate school, and professional employment;
3. providing opportunities to share experiences, advice, and ideas with women at different stages of their education or career paths.
