Shock Physics Papers 2019

H. Lei, J. Li, X. Li, W. Lin and K. Wang 2019 “Microscopic evolution of solid-hydrogen shells under the ultrafast dynamic compression” Appl. Phys. Letts 114 101601

H. Liu, Y. He, J. Li, Z. Zhou, Z. Ma, S. Liu and X. Dong 2019 “ReaxFF molecular dynamics simulations of shock induced reaction initiation in TNT” AIP Advances 9 015202

A. Mandal and Y.M. Gupta 2019 “Elastic-plastic deformation of molybdenum single crystals shocked to 12.5 GPa: Crystal anisotropy effects” J. Appl. Phys. 125 055903

F. Yang, D. Kong, F. Wang and L. Kong 2019 “A traceable dynamic calibration research of the measurement system based on quasistatic and dynamic calibration for accurate blast overpressure measurement” Meas. Sci. Technol. 30 025005
